

WORKSHOPS SEASON 2022 / 2023

3 actors

30 pupils

100 minutes

To begin, the actors will introduce the students to different theatrical techniques. Here is an example of games and exercises performed (non-exhaustive list):

- Energetic exercises: ice breaking, names games...
- Concentration exercises: body work (mirror, sculpture...)...
- Diction exercises: voice work, breathing...

Then, each actor will have the role of "director" and work with different groups of students. Their objective will be to create a short story, an ad, an idea, etc.

Finally, each group of students will present and perform their creation in a rhythmic, dynamic way in front of the other groups.

This moment is followed by an exchange between the students and the actors to explain what was done, what was felt, the difficulties, the surpassing of oneself, the surprises...

A total immersion, a unique creative space that will allow you to release the part of the actor that lies dormant in each of your students.

On the program: games, improvisations, small scenarios to interpret, all in English, of course!

A wonderful challenge for your students.
